# PROMOTIONAL MATERIALS/DISSEMINATION OF THE PROJECT:

## CONCLUSIONS

The team that managed the project "Playing with new words,, believes that the objectives have been met:

1. Promoting foreign language acquisition and increasing the participation of young students in language learning  
- the students of our Center actively participated in the partners' visit to our country and in all online activities;
2. Increasing involvement and encouraging students to study a foreign language – through the platform created from the interaction of partner countries
3. Enable the exchange of best practices between EFL teachers across Europe;
4. To encourage teachers to improve their careers – other colleagues have also expressed their desire to get involved and participate in future projects;
5. Improving language learning and developing students' skills – our students had the opportunity to speak directly with teachers from partner countries in English;
6. Build students' self-esteem and confidence in using English;
7. To cultivate respect for other countries, intercultural friendships and mutual acceptance/tolerance – this was observed both in the assistance in classes and especially in the creative-practical skills activities in our Center where all participants were involved, regardless of country or nationality.
